MEMORANDUM FOR: Deputy Director of Central Intelligence
Executive Director
Deputy Director for Administration
Deputy Director for Intelligence
Deputy Director for Operations
Director, Office of Personnel

FROM: Director of Central Intelligence

SUBJECT: Retirement

1. At a Cabinet breakfast this morning I set forth our concerns about changes in our retirement, indicating that I had already taken the matter up with David Stockman. He said that in response to my telephone call and letter yesterday he had taken out the last paragraph of the bill which deals specifically with 60 years as retirement for CIARDS people. This would keep early retirement for people with overseas service, and law enforcement officers, fire fighters, etc. He argued that people who spend a career behind a desk in State, CIA and other places should be treated the same way as people who work behind a desk in the rest of the government. I expressed strong disagreement and said that this would have to be thrashed out when there is more time.

2. Someone should check back to see exactly what OMB did yesterday and let me know what we now have to fight and what the next step should be.

William J. Casey
